

Flandersstone is Perth's only supplier of natural European Building Stone, which has been used in countries across Europe for thousands of years. The company is also the only supplier of quality York Stone Flagging and Building Stone in Perth.

With more than 35 years of experience in the stone business, Jim from Flandersstone can help guide you through any project, from showroom selection right through to your finished product. The company's comprehensive showroom in Joondalup displays a variety of showpanels that are entirely unique in their make and not available anywhere else in Perth.

Also supplying marble or stone fireplaces and mantels, the company's styles are inspired from a range of historical periods, including the reign of French Louis V, baroque, Victorian or even contemporary chic. All you need to do is tell Jim and his team what you want and they will take care of the rest!

If there's one thing Flandersstone knows, it's stone!
